

Electrotherapy and Associated Courses

A wide range of Electrotherapy Update Courses are delivered throughout the country throughout the year, with varying content, aims and duration, though most are of one whole day duration. The content of each course is determined by those organising the event. Some are put on by Trusts as a part of their CPD activities, some by Special or Clinical Interest Groups and others by groups of practitioners. Several electrotherapy and associated companies organise events on a regular basis.

The list below indicates the dates and locations of the forthcoming events together with the contact details of the course organiser. For those who are interested in further details of such events, it is suggested that you contact the relevant person directly as I do not deal with applications or local arrangements. If you experience difficulties in making contact with the organiser, please do send me an e mail and I will attempt to get the best information to you.

The information is provided 'as is' and by putting the course information on this page, I can not guarantee that it will go ahead (even though it is booked), nor can I influence the cost or other arrangements - these are all down to the local organisation. Most courses will welcome applicants, though some may have restrictions as to the number that can be accommodated or whether they are only available to physiotherapists etc etc.

Date	Location	Course Type	Course Organiser	Contact Details
2007				
16th January	Huddersfield	Electrotherapy Update	Jane Hodgson	Jane.Hodgson@cht.nhs.uk
20th January	Wexham	Electrotherapy Update	Catherine Rout	Catherine.Rout@hwph-tr.nhs.uk

24th November	to be confirmed	Tissue Repair	PhysioUK	info@physiuk.co.uk
30th November	Teeside	Electrotherapy Update	Angela Wilkin	Angela.Wilkin@stees.nhs.uk

Both the SKF and the PhysioMed sponsored courses are based on a 2 day programme, with the first day concentrating on Tissue Repair and the modalities that can influence this process (Ultrasound, pulsed Shortwave and Laser) and the second day based around electrical stimulation and pain management (covering TENS, Interferential, Muscle Stimulation and Combination Therapy). Each day stands alone, though taken together, they do provide a reasonably comprehensive pair.

Tissue Repair Courses - 2007 - these will be run through PhysioUK and we are hoping to be able to put on a decent sized event at several key locations around the country rather than lots of small courses. You can either e mail me t.watson@herts.ac.uk or link to [PhysioUK](#) website to catch up with the latest developments

MSc Module - Evidence Based Electrotherapy - University of Hertfordshire : I run a 2 week programme as part of the MSc Physiotherapy at the university which is open to individuals who wish to take the electrotherapy module as a stand alone course. If the assessment is taken at the end of the module (and you are successful of course) then there are 15 M level credits available. The course can be taken without assessment if you would rather. For further details, contact Mary Sexton (M.T.Sexton@herts.ac.uk). The 2007 dates are : the weeks of 7th May and the week of 18th June.
